

Impressions of the Electric Vehicle Event 2010

Windsor's first Electric Vehicle Event took place at the RET-Center. Green Sun Rising's President Klaus Dohring explains visitors the functionality of Solar Photovoltaic Systems.

The local media was very interested in this event as well. Green Sun Rising's Vice President Tanja Nuske gives an interview to Radio AM 800.

One of the highlights of the event was this ZENN (Zero Emission No Noise), attendants were eager to learn more about this and other electric vehicles, such as the plug-in Toyota Prius.

Some of Windsor's police fleet cars are hybrid vehicles. This one is charged at the RET-Center Solar Charging Station.

There were also some electric bikes present at the event. Visitors and even the media took the chance to drive a bike powered completely by electricity.

The bikes were courtesy of Scoot-A-Long Windsor. For more information please visit our website: www.EV4solar.com
